

Geothermal and Heat to Power Gas Systems

Geothermal Wells & Energy Storage Systems

ANALYSIS & DESIGN DEVELOPMENT:

Well Analysis...

- Flow Rate Design,
- Pressure Design,
- Fill Rate System Design,
- Cooling System Design.

Evaporator Design...

- Compressor Design,
- Turbine Design.
- Safety System Design,
- Monitoring Design,
- Operation and Maintenance Planning.

Secure Supplies is designing and developing *geothermal wells* and *energy storage systems* for already deployed sites.

Quality Management System:

ISO9001-2015
GJB9001B-2009 (MIL)

Secure Supplies Product/s Meet Customers Demands.

Authorized Representative
